TECHNICAL SKILLS

- Proficient in HTML, CSS, JavaScript, PHP, and SQL
- Experienced in using Git for version control
- Familiar with web frameworks such as React and Symfony

PERSONAL PROJECTS

sardarkhan.dev

My personal portfolio website displays my web development skills, projects, and achievements. It has text and logo animations, responsive design, smooth transitions, and clear navigation. I built it with HTML, CSS, and JavaScript and deployed it on GitHub Pages. Visit <https://your-website-url.com> to see my creative, passionate, and professional work.

RestaurantIstanbul

Created a static website using React JS for a restaurant that displays the menu, contact information, and location of the business. The website is simple, elegant, and fast, using React components, hooks, and routing. The website is built with create-react-app and deployed on CodeSandbox at <https://xs1wnz-3000.preview.csb.app>. This website demonstrates my ability to use React JS to generate static websites with client-side routing

TODO-LIST

Developed a web application using HTML, CSS, and JavaScript hosted on Codepen, featuring a todo-list with the ability to add, edit, remove, completed, and categorize tasks, and responsive design for seamless user experience on different devices.
